OTHER PROCUREMENT, ARMY

ACTIVITY 1, TACTICAL AND SUPPORT VEHICLES

APPROPRIATION

March 1996

~~FOR OFFICIAL USE ONLY~~

19960416 144

OTHER PROCUREMENT, ARMY

APPROPRIATION LANGUAGE

For construction, procurement, production, and modification of vehicles, including tactical, support, and nontracked combat vehicles; communications and electronic equipment; other support equipment; initial spare parts, ordnance, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliance, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; \$2,627,440,000, to remain available for obligation until September 30, 1999.

Other Procurement, Army

SECTION 3

Comparison of Program Requirements and Financing

Comparison of FY 1996 program requirements as reflected in the FY 1996 Budget with FY 1996 program requirements as shown in the FY 1997 Budget.

Comparison of FY 1996 financing as reflected in the FY 1996 Budget with FY 1996 financing requirements as shown in the FY 1997 Budget.

Comparison of FY 1995 program requirements as reflected in the FY 1996 Budget with FY 1995 program requirements as shown in the FY 1997 Budget.

Comparison of FY 1995 financing as reflected in the FY 1996 Budget with FY 1995 program requirements as shown in the FY 1997 Budget.

COMPARISON OF FY 1996 PROGRAM REQUIREMENTS  
AS REFLECTED IN THE FY 1996 BUDGET  
WITH THE FY 1996 PROGRAM REQUIREMENTS AS  
SHOWN IN THE FY 1997 BUDGET  
SUMMARY OF REQUIREMENTS (In Thousands of Dollars)

Appropriation Other Procurement Army	FY 1996 Requirements Per FY 1996 Budget	FY 1996 Requirements Per FY 1997 Budget	Increase or (Decrease)
Activity 1 - Tactical and Support Vehicles	127,828	440,639	312,811
Activity 2 - Communications and Electronics Equipment	1,691,424	1,813,969	122,545
Activity 3 - Other Support Equipment	351,224	338,819	(12,405)
Activity 4 - Initial Spares	86,125	83,436	(2,689)
	2,256,601	2,676,863	420,262

EXPLANATION BY ACTIVITY

Activity 1 - Tactical and Support Vehicles - Increases resulted from Congressional adjustments to the High Mobility Multi-Purpose Wheeled Vehicle (HMMWV) (\$72,000); Family of Medium Tactical Vehicles (FMTV) (\$110,000); Family of Heavy Tactical Vehicles (FHTV) (\$125,000); and Medium Truck ESP (\$20,000) total Congressional increases of \$327,000.

Activity 2 - Communications and Electronics Equipment - Congressional adjustments to Navstar Global Positioning System (\$17,500); Army Data Distribution System (\$25,000); SINGARS Family (\$54,100); EAC Communications (\$40,000); Information Systems (\$12,000); Local Area Network (\$10,000); General Defense Intelligence Program (\$5,221); Commanders Tactical Terminal (\$18,700); FAAD GBS (\$19,200); Night Vision Devices (\$8,000); Advanced Field Artillery Tactical Data System (\$1,500); FAAD C2 (\$7,400); Maneuver Control System (\$5,000); ADPE (\$6,000); and Integrated Family of Test Equipment (\$18,500) resulted in total adjustments of \$190,679.

Activity 3 - Other Support Equipment - Congressional adjustments to Items Less Than \$2M (POL)(\$-837); Items Less Than \$2M (Float/Rail)(\$-1,000); Nonsystem Training Devices (\$4,500); and Modification of In-Service Equipment (\$-7,500) resulted in total adjustments of \$-4,837.

A proportionate reduction was made for Section 8125 economic assumptions (\$-17,000); Section 8046(D)(FFRDC)(\$-100); Section 8101 (ADP)(\$-3,800); and revised economic assumptions and potential reprogrammings (\$-71,680).

<p>DESCRIPTION: The M1061A1 is a 5 Ton, tandem axle, 4-wheel flatbed trailer. This trailer is designed to carry Fuel Pods, Laundry Units, and large generators. It is used by the Air Force and interchange customers. The trailer is towed by a 5 ton truck, uses an air over hydraulic brake system which receives air pressure from the towing vehicle. It is equipped with manually operated leveling jacks on the four corners of the trailer that fold to a stowed position and has an under chassis mounted spare tire. The trailer's electrical system consists of an intervehicular cable, wiring harness, and two composite light assemblies. Power is supplied by the towing vehicle.</p>

<p>DESCRIPTION: The High Mobility Trailer (HMT) is a family of high mobility companion trailers for the High Mobility Multipurpose Wheeled Vehicle (HMMWV). The HMT will be compatible with both the light (Group I/II) and heavy (Group III) HMMWV variants. This will require a HMT family of trailers (light, heavy and heavy chassis) in order to make full use of the HMMWV's towing capabilities.</p> <p>JUSTIFICATION: The HMT is required to improve off-road mobility and increase payload over the present M101 series 3/4 ton trailers. It will be used in support of communications systems hauling Tactical Quiet Generators. The HMT also offers stability lacking in the current M101/HMMWV combination because the HMT wheels will have the same track width as the HMMWV.</p>

<p><b>DESCRIPTION:</b> The Dolly Set consists of two sections, a front unit and a rear unit, each consisting of an axle, frame, and lift mechanism with the front unit having a tow bar. The dolly set is required to provide ground mobility for the Army's family of rigid wall International Standard Organization (ISO) configured shelters and containers up to 15,000 lbs. The Dolly Set must be able to secure and move the shelter when pulled by the 5 Ton Cargo Truck. Both units of a Dolly Set may also be coupled and towed empty or in tandem with a second empty set.</p> <p><b>JUSTIFICATION:</b> Joint procurement for the Army, Navy, and USMC. This is required to support the fielding of the Deployable Medical System (DEPMEDS), Aviation Ground Support Equipment, Explosives Ordnance Disposal, and Guardrail. These systems are currently not transportable without Dolly Sets.</p>

DESCRIPTION: The M105A3 is a two-wheeled, 1 1/2 ton cart-type trailer which is used to transport general cargo over highways as well as cross-country terrain. It is capable of fording hard-bottomed water crossings. This trailer has a steel cargo box equipped with a tailgate and side racks, a 24-volt electrical system, air/hydraulic brakes, gladhands, an adjustable front-end caster assembly and manually operated parking brakes. The brake master cylinder is positioned for ease of maintenance, landing gear is fully adjustable, and the entire trailer is corrosion resistant. The trailer is Roll-on Roll-off capable and is fitted with radial tires.

<p>DESCRIPTION: The M871A2 is a 22 1/2 ton Semitrailer, Tactical, dual purpose, bulk container transporter. The Semitrailer will be used within the military logistical support system within CONUS and OCONUS theaters to transport 20' International Standard Containers on line haul tactical missions and as the primary means of distributing containers and bulk cargo. It will be employed with military standard 5 Ton tractors for use over primary, secondary, and unimproved secondary roads or the military adapted commercial M915 tractor over primary roads only.</p> <p>JUSTIFICATION: The M871A2 semitrailer is the only authorized worldwide (CONUS/OCONUS) transporter within the military logistics system of International Standard Organization (ISO) Container. Besides hauling ammunition and general cargo, the M871A2 is the primary transporter of the 3,000 gallon Reverse Osmosis Water Purification Units (ROWPU). The M871A2 is employed with military standard 5 Ton tractors for use over primary, secondary and unimproved secondary roads or the military adapted commercial M915 tractor over primary roads only.</p>

SEMITRAILER VAN CGO SUPPLY 12T 4WHL M129 (DD4800)

DESCRIPTION: The M129A4 is a 12-ton, 35 foot, four wheel multipurpose Tactical Transport Semitrailer Van. The van body will be of aluminum construction, watertight and airtight. Aluminum body is a metal structure with steel under-carriage frame. The van body will be provided with urethane foam in place of insulation. The electrical system will have 12-24 volt D.C. capacity with tactical and commercial wheeled tractors. The Semitrailer Van will meet current transportability standards. Prime movers are military 5 Ton Trucks.

JUSTIFICATION: The FY97 funds support the procurement of the M129A4 Semitrailer Van configuration that is used by various types of support units engaging in the storage, transportation and issue of Military supplies. The Van will house sophisticated electrical equipment (radio and computerized) for Command Post communications, spare parts, and maintenance tool shops for field repairs. The user has 100% mobility requirement to store, transport and resupply Prescribed Load List/Authorized Support List (PLL/ASL) Class IX items and 80% of the repair parts to the forward elements in a relatively short period of time (20 minutes). The remaining 20% of the repair parts will be in place within a 3-4 hours timeframe. The current fielded systems do not meet the user unique requirements for the transportation and issuance of repair parts. The vehicle will have built-in flexibility to permanently secure modular storage and drawer systems for the transportation and issue of shop inventories and military supplies.

# BUDGET ITEM JUSTIFICATION SHEET

March 1996

DATE

APPROPRIATION / BUDGET ACTIVITY

OTHER PROCUREMENT /Tactical and Support Vehicles

P-1 ITEM NOMENCLATURE

HI MOB MULTI-PURP WHILD VEH (HMMWV)(MYP) (D15400)

	FY 1994	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
QUANTITY		1352	1586	1126	750	1545	1506	1398
COST (in millions)		117.1	125.6	96.8	65.0	125.0	123.8	118.0

DESCRIPTION - The HMMWV is a lightweight, high performance, four-wheel drive, air transportable and air droppable, high mobility tactical family of wheeled vehicles. The vehicle has a diesel engine, automatic transmission and payloads of 2500/3660/4400 lbs. for HMMWV Group I, Group II and Heavy HMMWV (M1097) respectively. The Block 1, or A1 models of the HMMWV began fielding in March 1994. The A1 models have improved seating, upgraded electronics and M1097 components across the family. The A2 models have an updated EPA compliant engine and a 4-speed automatic transmission. The Scout HMMWV is a specially modified Armament carrier to accommodate the Scout mission role. The Up-Armored HMMWV (M1114) provides greatly improved ballistic protection versus the basic HMMWV. The chassis will be used for other programs where the M1097 has insufficient capacity.

JUSTIFICATION - The HMMWV continued production is required to support the expanding mission roles of the HMMWV and the threat that is encountered. In addition to the continued roles of Personnel Carrier, TOW Anti-tank Carrier, Armament Carrier, Shelter Carrier and Ambulance, new missions and threats have generated the need to increase payload and protection levels for the HMMWV. The M1114 improves the protection levels to that of light tracked vehicles. The increase to 10,000 lbs. gross vehicle weight (GVW) of the M1097 and A2's, is being followed with an increased GVW to accommodate the M1114 Scout mission requirements and the M1113 for other shelter systems. The M1114 will be used to replace the M2/M3 Bradley vehicles in the Scout mission roles and M1113 to support numerous fielded and emerging systems such as Non Line of Sight-Rear (NLOS-R), Avenger, and Standard Integrated Command Post System.

COST (in millions)		370.2	144.1	233.1	138.7	234.5	279.3	341.5		

DESCRIPTION - The Family of Medium Tactical Vehicles (FMTV) is a complete series of trucks based on a common chassis and varied by payload and mission. The Light Medium Tactical Vehicle (LMTV) has a 2 1/2 ton capacity consisting of cargo and van models. The Medium Tactical Vehicle (MTV) has a 5 ton capacity and consists of cargo, tractor, van, wrecker, tanker, and dump truck models. Subvariants provide Low Velocity Air Drop (LVAD) capability for contingency and rapid deployment operations. Commonality between variants significantly reduces operation and maintenance costs. FMTV, intended to replace obsolete and maintenance-intensive trucks currently in the fleet, performs local and line haul, unit mobility, unit resupply, and other missions in combat, combat support, and combat service support units.

JUSTIFICATION - The FMTV is required to fill the 2-1/2 ton truck (LMTV) and 5 ton truck (MTV) requirements, reduce significant operating and support costs, resolve operational deficiencies and operate throughout the theater as multi-purpose transportation vehicles used by combat, combat support, and combat service support units. The system is designed to be rapidly deployable worldwide and operate on primary and secondary roads, trails, and cross-country terrain. Vehicle operates in all climatic conditions.

QUANTITY										
COST (in millions)		15.6	51.3	77.4	9.4	9.9	17.0	50.0		
<p><b>DESCRIPTION</b> - The Palletized Load System (PLS) consists of a 16.5 ton payload prime mover (10x10) with an integral load-handling system, which provides self-loading and unloading capability; a 16.5 ton payload trailer; and demountable cargo beds, or flatracks. The PLS performs line haul, local haul, unit resupply and other missions in the tactical environment to support modern and highly mobile combat units. The PLS truck is equipped with a central tire inflation system (CTIS) which significantly improves off-road mobility. An intermodal flatrack with enhanced transportability, stacking and deployability has been designed and has been in production since FY95.</p> <p><b>JUSTIFICATION</b> - The PLS is the primary component of the Maneuver Oriented Ammunition Distribution System (MOADS) in support of the field artillery. The PLS will allow interoperability with the comparable British, German and French systems, through the use of a common flatrack. A flatrack to truck ratio of at least 10:1, in theater, has been determined to be the minimum requirement to support MOADS. A container handling device (CHD) will be fielded to transportation and ammunition units and to forward support battalions providing the capability to pick up and transport 20 feet International Standards for Organization (ISO) containers without the use of a flatrack. FY97 funds procurement of flatracks and CHDs only.</p>

DESCRIPTION - The Armored Security Vehicle (ASV) is a turreted, lightly armored all-wheel drive vehicle that provides ballistic protection, overhead protection and protection against landmines. The ASV will accept the MK-19 grenade machine gun, the M-2 .50 caliber machine gun and the M-60 7.62mm machine gun. The ASV will be transportable by C-130 and larger aircraft, rail and marine transport modes. The ASV will be capable of carrying four persons. The vehicle will have a diesel engine, automatic transmission, central tire inflation system and a payload of 3,360 lbs with all kits installed. The ASV will be used as the platform for the Mobile Ordnance Disrupter System (MODS).

JUSTIFICATION - The ASV will be used by the Military Police (MP) to perform missions across the entire operational continuum. The MP units are under-protected for their doctrinal combat support mission. The ASV concept was approved under the Armored Family of Vehicles Operational and Organizational concept approved in June 1987. The MP's will conduct Airland Battle Operation missions in a warfighting environment or they will perform force protection and stabilization operations in a short of war contingency environment.

<p>DESCRIPTION - The Medium Truck Extended Service Program (ESP) is a remanufacturing program for 2 1/2 ton and 5-ton cargo trucks in CONUS. ESP provides a vehicle that meets current emission standards and includes numerous safety improvements. ESP vehicles are equipped with a new engine, Central Tire Inflation System (CTIS) for enhanced mobility, automatic transmission and power steering.</p> <p>JUSTIFICATION - The Medium Truck Extended Service Program (ESP) provides a cost effective means to assure an adequate inventory of medium tactical trucks by remanufacturing a portion of the existing 2 1/2 ton and 5-ton fleets in a "total force" framework in conjunction with Family of Medium Tactical Vehicles (FMTV) procurement. ESP allows the total Army (Active, Reserve, and National Guard) to enhance its readiness in a time of declining defense spending.</p>

INDIVIDUAL MODIFICATION		Date	March 1996
MODIFICATION TITLE:		M939 Brake Proportioning Valve 1-95-06-4495	
MODELS OF SYSTEMS AFFECTED:		M939 FOV	
DESCRIPTION / JUSTIFICATION:			
<p>DESCRIPTION: An empty or light loaded M939 series truck will skid when the rear brakes are locked during panic braking on wet/slippery road surfaces. Valve replacement is a simple and inexpensive procedure for increasing the brake system performance and provide greater vehicle stability under panic stop conditions. This modification will reduce rear wheel lockup and shorten stopping distance, thereby reducing the number of accidents and deaths.</p>

<p>Three Point seatbelts were added to the HMMWV vehicles in response to increased safety regulations in 1989. The three point belt system was cut into production for all vehicle models beginning with vehicle serial number 100,000. Retrofit kits for pre 100,000 serial number vehicles were developed and modeled after the production version. This material change will be applied using one of the three hardware kits and template kits developed to cover the different vehicle configurations.</p>

INDIVIDUAL MODIFICATION		Date	March 1996
MODIFICATION TITLE:		M939 Armor Kits No OSIP No.	
MODELS OF SYSTEMS AFFECTED:		M939 5-Ton Truck (Bosnia)	
DESCRIPTION / JUSTIFICATION:			
<p>DESCRIPTION: The Army Deputy Chief of Staff for Operations and Plans (DCSOPS), in a memorandum dated 19 Dec 95, validated an urgent requirement to accelerate procurement of 165 5-Ton Truck Armor Kits in support of Operation Joint Endeavor.</p> <p>JUSTIFICATION: Armor kits for these vehicles are necessary to provide U.S. Army soldiers in Bosnia protection from mines, small arms fire, and fragmentation from mortars and artillery. Fielding of kits was required to commence no later than 1 February. U.S. Army units deployed in Bosnia to conduct peace-keeping operations will operate in areas saturated with small arms, mines, and mortars. Tactical wheeled vehicles afford minimal inherent protection, and provide risk to crew members. Armor kits will provide significant enhancement to protection of these tactical wheeled vehicle crews. Kits will be installed during the operation.</p>

<p><b>DESCRIPTION:</b> This equipment consists of various tool and shop sets essential to the maintenance of the Army's Worldwide Tactical Wheeled Vehicle Fleet. These sets include components as small as a screw driver to as large as an International Standard Organizational (ISO) Shelter. The maintenance equipment and tools have multi-application to the maintenance organization tasked with maintaining tactical and support vehicles.</p> <p><b>JUSTIFICATION:</b> While these items neither move, shoot or fly, they are vital to maintenance programs that will significantly reduce equipment downtime and will maintain the wheeled vehicle fleet at a required level of readiness. Requirements include fleet initial fieldings, Equipment Readiness Code (ERC) A shortages and interchange requirements.</p>

<p>DESCRIPTION: Vehicles are of standard commercial design, intended to provide transportation for Army and civilian personnel and dependent schoolchildren. The vehicles include sedans, ambulances and buses.</p> <p>JUSTIFICATION: The Passenger Carrying Vehicles are used for training support, quality of life, installation services, investigation, field intelligence and security. All budgeted procurements of non-tactical vehicles are urgently required to satisfy priority requirements, fill existing worldwide shortages and replace overage/overmileage vehicles. The fielding of new vehicles will alleviate excessive downtime, reduce maintenance and repair costs and maximize mission capabilities of users.</p>

<p><b>DESCRIPTION:</b> Vehicles are of standard commercial design and are intended primarily for general administrative use in transporting personnel and cargo. Vehicles are procurable from regular production lines and include light to heavy trucks such as carryalls, panel trucks, stake trucks, trailers, semitrailers and fuel-servicing tankers. The kit-ready light armored vehicles are also within this category.</p> <p><b>JUSTIFICATION:</b> All budgeted procurements of General Purpose Vehicles are urgently required to satisfy high priority requirements, fill existing worldwide shortages and replace overage/overmileage vehicles. The carryalls are needed for covert activities OCONUS. The fielding of new vehicles will alleviate excessive downtime, reduce maintenance and repair costs and provide greater operational safety.</p>

<p><b>DESCRIPTION:</b> Vehicles are commercially designed for specialized use in the direct support of facility engineering, maintenance and similar activities within an organization. This includes maintenance trucks, dump trucks, refuse trucks and other vehicles with mounted equipment. Special Purpose Vehicles are managed under the age or mileage criteria.</p> <p><b>JUSTIFICATION:</b> The Special Purpose Vehicles are not being converted to General Services Administration (GSA) lease, therefore support to the health and welfare missions of the field must continue to be provided by procurement. The service platform trucks are required to continue the engineering support mission necessary to the operation of posts, camps and stations. All budgeted procurements of non-tactical vehicles are urgently required to satisfy high priority requirements, fill existing worldwide shortages and replace overage/overmileage/substitute vehicles. The fielding of new vehicles will provide greater operational safety, alleviate excessive downtime, reduce maintenance and repair costs and maximize the mission capabilities of users.</p>

P-1 ITEM NOMENCLATURE

SYSTEM FIELDING SUPPORT (TACOM) (DA0071)

	FY 1994	FY 1995	FY 1996	FY 1997	FY 1998	FY 1999	FY 2000	FY 2001
QUANTITY		0	0	0	0	0	0	0
COST (in millions)		0.9	1.9	1.9	1.0	0.9	0.9	0.9

DESCRIPTION: System Fielding Support costs consist of funding required for First Destination Transportation, Total Package Fielding, New Equipment Training and Interim Contractor Logistic Support for various tactical and support systems, including, but not limited to, cargo trailers, water tank trailers, dolly sets, semitrailers used to transport and dispense fuel, and general purpose vehicles. First Destination Transportation provides for the shipment of newly procured equipment and materiel from the acquisition of initial issue support equipment and deprocessing costs for the total package fieldings of tactical and support vehicles. New Equipment Training (NET) funding is required for the training of personnel in the operation/maintenance of various tactical and support vehicle systems.

JUSTIFICATION: Funding is required to support Total Package Fielding (TPF) for tactical and support vehicles. The TPF requirement will support costs associated with requisitioning and receipt of initial supply items, package of end items for total package fielding and processing hand off costs at a staging area prior to issue to a unit. Funds are also required to support the transportation of items from the contractor's plant to the point of first acceptance into the Army's inventory. New Equipment training provides instruction in operation and maintenance of tactical and support vehicle systems. It is essential that it be provided in the time frame required to guarantee that trained personnel are available concurrent with the issue of equipments.
